

Jeshua: The Personal Christ Vol. 7

Chapter 17 - The Basic Law of the Universe

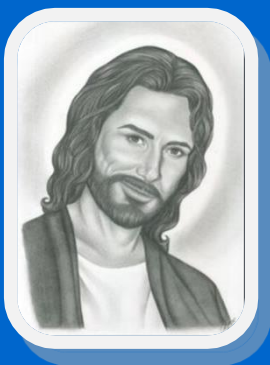

Study Guide

October 21, 2020

Volume 7, Chapter 17

“In your life you can feel the underlying current of life energy and know that it is always going forward, expanding as the energy of spirit. Take the deep breath and allow yourself for a millisecond to touch the current that is underlying everything.”

Jeshua

Introduction

Can you say EXPANSION? The basic law of the Universe is “Life expression wanting to experience Itself, forever ongoing, forever creating, forever expanding. The basic nature of the universe, formed and unformed, is expansion. ***You are the universe Itself.***” The remarkable thing is that it applies to the very large, as with the cosmos and to the universe within us.

Looks like the “the darkness is coming up now in the dramas in the political arena”. And from Jeshua’s perspective this is positive since it promotes that which was hidden to be exposed to the light and thus, begin the process of healing. In our timing the process is slow, and “it takes a while before it is obvious”. But the healing and the progress toward the light are happening.

The beautiful part in this chapter is that Jeshua assures us we will throw off the heaviness of the world and really get the joke, when we realize “It is my divinity that truly orchestrates my life.” When we truly trust Divinity to take care of us, we can walk with “a step that is lighter, that is free”. Freedom is knowing and believing in the immense capacity of Divine Love and Oneness.

There is also the powerful idea of the “underlying current of life energy that is the forward and expansive energy of spirit”. Jeshua describes it as going into the mind and then into feelings. We can experience this life-force current that underlies everything when “you take the deep breath”! That is spirit moving through each of us and propelling our lives in whatever form we make want to take – even that of the wholly mammoth.

The power principles of “The Basic Law of the Universe?”:

- “The basic law of the universe is expansion, always and forever expanding, experimenting and expressing until the purpose of time has been fulfilled.”
- “Truly everything is energy, whether it is formed or unformed.”
- With this energy we are capable of creating universes, within & without.
- Our Breath is a direct connection to the underlying current of Divinity.
- Everyone is in the right place on their journey. If they are not awakening now, they will at some time.
- We have a “good future” where we “will be happy every day, every moment, even outside of time”.

**Affirmation
for the
Week:**

**“I am the spirit
that activates
everything that
I see.”**
Jeshua

Discussion Questions

- What passage in this chapter touches your heart? Your mind? Your imagination? Changes how you understand yourself and your life?
- Jeshua tells us “Everything I have thought that maybe I could have done better was actually perfect at that time.” Think of a situation in your life where you thought that you had made a big mistake or wrong choice or did not perform well. Now turn it around and look at it in hindsight and see how it really was “perfect” because it was part of how you got to where you are today. Ponder this concept and own how perfect your life really is. What would you say to that part of you that still feels you “should” have handled your situation differently? Once you have reframed your situation, repeat to yourself “I am blessed because I have come through this. It is my divinity that truly orchestrates my life.” Smile at yourself and your new wisdom. Share with your partner.
- Can you see how the Light is being shown upon world situations that have been hidden before? Do you think that all things that are “swept under the rug” will be exposed? Give some examples where that has happened in your lifetime and how those have led to the expansion of consciousness and evolution of humanity. (examples might be civil rights, environmental movement, awareness of poverty, injustice and violence in the world, or a personal experience etc.) Bring your heart into these issues “so that the healing can begin.” Journal about any insights that you may experience and/or discuss with trusted friend.

Assignments

- Jeshua tells us that “You are a galaxy in yourself. You are creative energy forever going forward, eternal, on-going, beyond even the concept of time, expansive energy – you have called it spirit – that is What you are.” Apply this principle, this power that Jeshua assures us that we are, to a creative project in your life. Ask yourself “What do I want to create?” or “What do I want to “re-create” – like a habit that no longer serves you? Call in the higher self of you or Jeshua or another master or angel (all are a part of you) and ask for assistance as needed. Begin by being curious, then feel yourself become passionate about this project. Gather your resources. Now begin your creative expansion! Keep a journal to track your progress, just for the fun of it.
- “Verily, many changes happen every day, and they all add together to bring the collective consciousness to awakening.” Where has your journey of

awakening taken you? What would you like to see healed in your life? Write about how that feels.

- Jeshua tells us that “Life expression is always expanding, wanting to experience Itself even more, forever ongoing, forever creating forever expanding. The basic nature of the universe, formed and unformed, is expansion. You are the universe Itself. You are a galaxy in yourself.” Think about how your body is a universe of constellations of organs, tissue, blood, bone etc. Each of us is a miraculous universe, halfway between the tiniest microbe and the stars. Focus in your meditation on this beautiful concept and appreciate yourself as an expression of the Life Force energy that creates universes. Spend some time each day for the next month in this expanded state and notice how it brings you Peace to be a part of such a large universe. Notice how it puts your daily life into perspective and how much more joyous your life can be. Try it and be in joy!
- **Affirmations for the Week:**
 - I AM eternal
 - I Am Divine.
 - I Am the spirit that activates everything that I see.
 - I Am of the Creator.
 - I Am the Galaxy.
 - I know the power, the peace and the love of the Father/Mother God.

NOTES:
