## Chapter 20 -Going Beyond Your Robotic Self Study Guide

November 4, 2020

Volume 7, Chapter 20

“You are going to make great changes because you desire to know your true power and, with that, your freedom. That is how powerful belief is. What you want to manifest does not need to be difficult.” *Jeshua*

### Introduction

Jeshua gives us exciting “out-of-this-world” news in this chapter! It is that we are in alignment with the galactic energy of our universe, in that there is a clear pathway from our Holy Mother Earth to the central sun, the center of our Milky Way galaxy. “With this alignment, there is now an opening for much energy to be streaming to holy Mother Earth, to your own sun and to your solar system. That is the shift that you have been hearing about for some years. It is a shift in energy that can be measured and accessed. It has been thousands of years since the last time when there was a direct pathway with no blockage to the central sun.”

It is an exciting time to be alive! What this means for us individually is that we can use this energy to make great changes, to release our robot self, with all its limitations, and to experience our dreams manifesting with greater power than ever before. **“It has to do with feeling and knowing and using your divine power.”** It is freely available to everyone, everywhere.

Perhaps you have already noticed how quickly you can manifest both your fears and your highest thoughts. So why not choose the most beautiful, harmonious, elegant and purest thoughts of peace, love and joy creations right now, while this opportunity exist? Jeshua beckons us to come out of the fog of the world. **“As you believe, so it will be unto you.”**

#### The power principles of “Going Beyond Your Robotic Self”

- We are in an extraordinary alignment with the central sun that has not happened in millennia.
- It is an excellent opportunity to use the streaming energy of this historical time to awaken to our divine nature.
- The physical sun is also a reminder of the “sun of your own being”, the “divine urge within you to know more, to feel more, to feel free, to be able to manifest.”
- “Dream big, because it is possible.” There is now more energy from the quantum field out of which we create our realities to build our dreams, to “become One with your dreams.”
- Coupled with the law of expansion, do not put limits on your dream, instead know, feel and visualize it “taking hold of the streaming energy.”

## Discussion Questions

- What passage in this chapter touches your heart? Your mind? Your imagination? Changes in how you understand yourself and your life?
- Think about the idea of speeding up the manifestation of your dreams? Jeshua says “those of you of feeling nature, you have felt it for some time now. If you still believe that the world has power over you, you are going to see that power dwindling. You are going to be rushing ahead, jumping ahead to that which you truly have desired, not having to go through a lot of the worldly hoops and hurdles.” So it becomes important to be clear what you want to manifest with this extra energy that is now available to us and taking us out of the density that we have experienced for so long. Let your heart be open to the divine self of you as you use this energy for the highest good of everyone concerned. Discuss with your partner what you want to manifest for yourself and for the larger community.
- Jeshua tells us that **“As you believe, so it will be unto you.”** This has always been true. But now it is even more important that we take off our glasses of limited seeing and expand our possibilities. “There has been a divine urge within you to know more, to feel more, to feel free, to be able to manifest.” Discuss this divine urge, how have you known it was there? What have you done to accommodate it? What will you do with it, now that you have not only the permission but the knowledge of the power to explore it and use it?

## Assignments

- Jeshua gives us an excellent assignment. “The pathway is open, and what you decree is going to be manifesting much more quickly than what you have seen in previous years and in previous lifetimes. So, therefore, it behooves you to **take out a piece of the notebook paper and write down what you would like to see, how you would like to see it, how it is going to feel, because truly out of the feeling nature come manifestation.**” Record this in your journal or computer and watch the miracles happen.
- Meditation on your big Dreams will hasten their manifest because setting aside the physical reality, it is easier to connect with the inner divine reality. So take your dreams and imagine the energy streaming from the central sun and feel the feelings of excitement, expectations and gratitude as you visualize having what you truly desire. Bring the future into the now and realize the power that gives you to create in the present moment. If you want to add even more power and strength to it, do a Master Mind practice with your partner. Here’s more information about another point of view on how to do this by Jack Canfield:
