

Jeshua: The Personal Christ Vol. 6

Chapter 15 Origin and Future of Planet Earth

Study Guide

February 5, 2020

Volume 6, Chapter 15

“You are the explorers. You are the ones who want to know the farthest frontiers. Why? For the sheer joy of it; because you want to create. You want to experience and express the divinity of you. You want to know the power of your divinity, the power of thought.” *Jeshua*

Introduction

Wow! This chapter really gives us the “Big Picture” of creation beginning with “Thought, an awareness, a presence, of creative Isness extending Itself”. Then the “thought was to bring forth Light and to coalesce Light into form”.

The amazing, mind-blowing part is that we were all there and we are a part of the “extension of Energy”. This is the very foundation of why Jeshua so often refers to our heritage as Divinity! We are part of this infinite energy that has created universes, our solar system and our very earth. The creation never stops.

“You began with being the sun, the energy of the star, being within the sun itself, know the consciousness of the energy of the star.” It is truly amazing that after these experiences we can fit into the earth-suits of our bodies. But in this life experience we have “come to this planet as starseeds”.

What is central is the reason for our starseed experience is “blending many cultural beliefs and systems of belief into a harmonious whole: the atonement, the awakening as One.”

The power principles of “The Origin and Future of Mother Earth” are:

- Remember “how vast, how wonderful you are”.
- “Allow the imagination to expand upon the Isness and the concept of Isness”.
- Live your life with the understanding that “you have agreed that you will bring your Light here”.
- Remember your purpose is to grow in the awareness that we are starseeds, who volunteered to bring about the harmonious blending of cultures and beliefs into the awakening of our Oneness.

Discussion Questions

- What passage in this chapter touches your heart? Your mind? Your imagination?
- What is your reaction to this information about the vastness of our consciousness? How does it make you feel about yourself? Are you able to sense your heritage of Divinity when you read and contemplate Jeshua's message?
- Do you like exploring? What is your motivation for exploring or creating? Do you experience "sheer joy" when you discover something that you did not know before?

Assignments

- Do a meditation where you go back to the point of creation and then experience yourself as one of the creations that Jeshua outlines in this chapter – like being part of the consciousness of a planet, Mother Earth, the sun or any star that you are drawn to. Imagine that you can remember the vastness of your consciousness in the Oneness. What does that feel like? Have you ever experienced that longing for "home" that Jeshua refers to? Contemplate and journal about it.
- This is a link to a very interesting conversation with a leading edge scientist who has a metaphysical perspective on creation and our existence as holographic. - **Affirmation: I know myself to be the extension of Divinity. I create for the sheer joy of the experience.**

Affirmation for the Week:

I know myself to be the extension of Divinity. I create for the sheer joy of the experience.

Jeshua
